Homework:

The syllabus above includes the reading and homework assignments of the course. The problems assigned in one week (that is, on Monday, Wednesday and Friday classes) are due the following Friday, at the beginning of the class. No late homework will be accepted. The solutions will be available at the course website by the following week. Please note the special arrangements for Lectures #20 to #22 before the midterm (with 6 problems due Friday 10/26), Lectures #25 to #27 (with 6 problems due Friday 11/2), Lectures #28 to #31 (with 8 problems due Friday 11/9), and for the last week of the course (Lectures #38 and #39). Additional voluntary projects using the software package MATLAB will be assigned during the course.

Grading system:

Homework 25%, midterm 25%, final 50%. (Closed-book midterm and final)
